Forecast for Saturday 28 Dec 2024

Weather: Mist and fog possible at the start of the day otherwise a cloudy day with some light rain and drizzle around Northwestern mountains, some brightness possible further south and east towards Bala, the sun might break through here for a time.

Chance of cloud-free hill tops above 800m: 20%, best chance further south and east. Some of the higher tops may break through the cloud layer and be in sunshine for much of the day.

Low Cloud and visibility: Extensive low cloud layers above 200m for western hills, cloud bases higher and more broken further south and east in the Welsh mountains with a few breaks and the chance of some fleeting views at the top of the more eastern hills. Visibility will be good but turning poor in drizzly outbreaks and very poor in mist and fog.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Poor visibility will be the main hazard on Saturday.

Forecast for Sunday 29 Dec 2024

Weather: Cooler and windier on Sunday, cloudy and mainly dry. Some early drizzle will clear away but it will be a cloudy day with a significant windchill.

Maximum wind: Southwesterly 20-25mph gusts 35mph, some gale force gusts later in the day.

Chance of cloud-free hill tops above 800m: 50%, cloud in the morning lifting and breaking in the afternoon.

Low Cloud and visibility: Layers of scattered of broken cloud above 400m will lift and break during the morning with some chance of clear mountain tops in the afternoon. Visibility poor in the morning but improving somewhat in the afternoon with some views possible.

Temperature: **Valleys:** Plus 6 rising to 9 Celsius.
At 800m: Plus 1 Celsius.
Freezing level: Above summits 1300m
